The laboratory grown diamond described in this Report ("Report") has been graded, tested, analyzed, examined and/or inscribed by International Gemological Institute ("I.G.I."). A laboratory grown diamond is one that has essentially the same chemical, physical and optical properties as a mined diamond, with the exception of being grown by man-made means and/or under conditions that are not those of nature. The Report is the only document currently available to I.G.I., including, without limitation, 10X magnification, corrected triplet loupe, binocular microscope, master color comparison stones, non-contact optical spectrometer, Raman spectrometer, Fourier transform infrared spectrometer, and/or instruments and/or processes as deemed appropriate by I.G.I. This Report includes, but is not limited to, the following information: (1) a description of the diamond and the instruments used; (2) a description of the diamond's characteristics; (3) a description of the diamond's security features. A duly accredited gemologist or jeweler can advise you with respect to the importance of and interrelationship between cut, color, clarity and carat weight.

THIS REPORT IS NEITHER A GUARANTEE, VALUATION, NOR APPRAISAL OF THE GEMSTONE DESCRIBED HEREIN. PLEASE REVIEW THE LIMITATIONS AND RESTRICTIONS SET FORTH ONLINE FOR ADDITIONAL INFORMATION.
